Payroll Overview

Elliott decreases the time it takes to process your company's personnel transactions. It enables you to accurately calculate both hourly and salaried employee. And Elliott's Payroll power extends beyond mere salary calculations. It extracts and processes benefit, insurance and vacation accruals. You also have the opportunity to generate regular payroll, vacation and special checks such as employee bonuses. Your data is secure when you enter it into payroll. Built-in system features ensure data integrity and password security prevents unauthorized access. Employ Elliott's Payroll to streamline and safeguard all your personnel financial information.

Highlights:

- Define hundreds of voluntary deductions and miscellaneous taxable or non-taxable earnings.

- Calculate all city, state, and federal payroll taxes using tax tables that can be updated on-screen without changing the program.

- Automatically generate a standard payroll.

- Process manual written checks and payroll adjustments.

- Calculate and print payroll.

- Handle meals, tips and tip credits for restaurants.

- Perform check reconciliation.

- Track labor costs by assigning job numbers.

- Print Federal W-2 forms and transmit on magnetic media confirming to SSA requirements.

- Record manual checks.

- Support multiple state and city taxes per employee.

- Through time transaction and expenses by job number information.

- Generate check for non-employee payments.

Integration:

General Ledger: All account distribution detail from posting of employee labor, bonus, vacation and other employer payroll related expenses might be transferred to G/L in full detail, by account summary or by date summary.
